Summary

Full Stack Developer (MERN, React Native, FastAPI) with two internships on live client projects, now focused on building AI-powered apps, LLM integrations and agent-driven developer tools. Ships end to end: APIs, authentication, deployment and mobile apps, and uses AI coding agents and AI prototyping tools daily to build faster.

Skills

AI and tooling: LLM and GenAI app development (MongoDB University certified), third-party AI service integration, AI coding agents, Google Stitch (AI UI/UX prototyping), prompt-driven workflows

Languages: JavaScript, TypeScript, Python

Backend: Node.js, Express, FastAPI, REST APIs, Google and Facebook OAuth, Bun

Frontend and mobile: React, React Native, Axios

Data and deployment: MongoDB (data modeling), aaPanel, Git and GitHub

Experience

Full Stack Developer Intern, Microcom International (Jaipur) | Apr 2026 – Jul 2026

- Delivered the frontend and backend of a client mobile app using React Native, Express, MongoDB and Axios, prototyping the UI/UX with AI tools such as Google Stitch to speed up design-to-code handoff.
- Converted Kamaaupoot, a real estate website, into a complete mobile app, giving the client a native app experience from an existing web product.
- Added Google and Facebook authentication to adpatterns.com, an AI ad intelligence platform, and researched how Facebook can share user data with AI services, enabling secure sign-in and groundwork for AI-driven ad insights.

- Built a bot-enabled website for Sinabeach, a client in Thailand, delivering the project for an international customer.
- Fixed bugs on tourotales.com and learned production deployment on aaPanel, improving the stability of a live client site.

Full Stack Developer Intern, Goklyn Pvt. Ltd. (Remote) | Mar 2025 – Sep 2025

- Delivered frontend and backend features across multiple client projects, working to client requirements in a remote team.
- Built the backend for an e-commerce platform, enabling the storefront to run on custom APIs.
- Designed the architecture of 2 complete websites, giving each project a clear structure for frontend and backend development.

Projects

AI Ad Intelligence SaaS – Integrated a trends API and built geo-interest intelligence features to help advertisers see what audiences in each region care about.

Higgsy (AI avatar generation) – Built with TypeScript, Express and Bun, integrating an image-generation API to generate avatars from user input.

Smart India Hackathon: Quantum-Inspired Traffic Route Optimization – Applied QPSO (quantum-inspired particle swarm optimization) to vehicle routing to reduce traffic congestion; worked in a team.

Highway Accident Prevention System – Built Phase 1, a drowsiness detection module, and am developing Phase 2, rash and erratic driving prediction.

URL Shortener – Built custom short URLs with email and password authentication and deployed it live.

Student Feedback System – Built a platform where senior authorities, including the vice chancellor, can collect student feedback on teachers.

Education

MCA, The ICFAI University Jaipur | May 2028

BCA, The ICFAI University Jaipur | May 2026 | CGPA 9.41/10

Certifications

- MongoDB University: Data Modeling
- MongoDB University: GenAI App Development
