Professional Summary

Software Development Engineer with 2 years of full stack experience building, testing, debugging and maintaining client web and mobile applications across the software development lifecycle (SDLC). Skilled in JavaScript, Node.js, Express, React Native, MongoDB and SQL, with Git-based collaboration, code reviews and technical documentation. Pursuing MCA and learning AI.

Technical Skills

- **Languages:** JavaScript, HTML, CSS, SQL
- **Frameworks and Libraries:** React Native, Node.js, Express.js, Axios
- **Databases:** MongoDB, SQL
- **Tools and Practices:** Git, GitHub, REST APIs, SDLC, debugging, troubleshooting, software testing, code reviews, technical documentation, aaPanel deployment, UI/UX prototyping (Google Stitch)
- **Learning:** Artificial Intelligence

Professional Experience

Software Development Intern, Microcom International | Apr 2026 - Jul 2026

- Delivered the Kamaaupoot real estate mobile app, as measured by [N screens/features] shipped, by converting the existing website into a React Native app with an Express and MongoDB backend, and designing the UI/UX with AI prototyping tools.
- Resolved [N] production bugs on tourotales.com, as measured by [fewer issues/faster load time], by debugging and troubleshooting application code.
- Added Google and Facebook authentication to adpatterns.com, as measured by [N users able to sign in], by integrating OAuth and researching Facebook's user data APIs for the client's AI services.

- Built a bot website for Sinabeach, a Thailand-based client, and learned production deployment on aaPanel while collaborating with team members on real client projects.

Software Development Intern, Goklyn Pvt. Ltd. | Mar 2025 - Sep 2025

- Designed the architecture of 2 complete websites, as measured by delivery to clients on [timeline], by structuring modular frontend and backend components.
- Developed the backend for an e-commerce application, as measured by [N endpoints/modules], by designing database schemas and REST APIs.
- Contributed to frontend and backend features on client projects, using Git for version control and participating in code reviews to maintain quality standards.

Projects

URL Shortener (Deployed) | JavaScript, Node.js, Express, MongoDB

- Built and deployed a full stack URL shortener, as measured by [N links/users] served, by implementing custom short URLs, redirects and email/password authentication.

College Student Feedback System | JavaScript, Node.js, Express, MongoDB

- Enabled university leadership, including the Vice Chancellor, to collect student feedback on teachers, as measured by [N responses/users], by building role-based feedback submission and reporting.

Education

Master of Computer Applications (MCA), The ICFAI University Jaipur | Pursuing, 2028

Bachelor of Computer Applications (BCA), The ICFAI University Jaipur | 2023-2026
